Optic Fiber Connectors Guidance

A patch cord is a fiber optic cable used to attach one device to another for signal routing.

LC Connectors

LC stands for Lucent Connector. It is a small form-factor fiber optic connector, half the size of the SC connector.

SC Connectors

SC stands for Subscriber Connector- a general purpose push/pull style connector. It is a square, snap-in connector latches with a simple push-pull motion and is keyed.

FC Connectors

FC stands for Fixed Connection. It is fixed by way of threaded barrel housing. FC connectors are generally constructed with a metal housing and are nickel-plated.

ST Connectors

ST stands for Straight Tip- a quick release bayonet style connector. ST connectors are cylindrical with twist lock coupling. They are push-in and twist types
